

## Skills

---

- Python (Pandas, NumPy, SciPy, Matplotlib, Seaborn, Plotly)
- SQL (MySQL)
- Scikit-learn, XGBoost, LightGBM
- Pytorch
- AWS (EC2, S3 Bucket, ECR, ECS, CodeDeploy)
- FastAPI
- DVC, MLflow
- Docker
- Git, GitHub, GitHub Action

## Projects

---

### TWITTER SENTIMENT ANALYSIS – Personal Project

August 2025

- Developed a sentiment classification model on **50,000+ Twitter posts** using **PyTorch LSTM**, achieving **90% test accuracy**.
- Implemented **NLP preprocessing pipeline** with **spaCy & NLTK** for tokenization, lemmatization, and stop-word removal, improving text quality and model performance.
- Optimized hyperparameters with **Optuna**, reducing training time and boosting accuracy by fine-tuning learning rate, dropout, and hidden layer dimensions.

### HYBRID SPOTIFY RECOMMENDER SYSTEM – Personal Project

May 2025

- Built a **Hybrid Spotify Recommender System** using **Collaborative Filtering** and **Content-Based Filtering** on **1M+ listening history records** and **50k+ music metadata entries**. Transformed and processed client's data by using DAX and Excel to ensure data completeness and validity.
- Conducted **Exploratory Data Analysis (EDA)** to understand user listening patterns and music attributes such as genre, tempo, and danceability.
- Developed a **production-ready ML pipeline** with **DVC, Docker, GitHub Actions, and AWS (S3, EC2, ECR, CodeDeploy)** for automated training, versioning, and deployment at scale.

### SWIGGY DELIVERY TIME PREDICTION – Personal Project

March 2025

- Built a **Delivery Time Prediction Model** for Swiggy using **Stacking Regression (Random Forest + LightGBM + Linear Regression)** on 45k+ records, achieving  **$R^2 = 0.83$**  and **MAE = 3.13 minutes** on test data.
- Performed **data cleaning, feature engineering, and EDA** on variables like distance, traffic, weather, and order time to uncover key factors influencing delivery duration.
- Designed a **production-grade ML pipeline** with **MLflow (experimentation & model staging)**, **DVC, Docker, GitHub Actions, and AWS (S3, EC2, ECR, CodeDeploy)** for automated training, versioning, and deployment.

## Education

---

### BACHELOR OF SCIENCE IN MATHEMATICS (SUBSIDIARY: STATISTICS)

2020 - 2023

Patna Science College, Patna

## Certifications

---

### DATA SCIENCE MENTORSHIP PROGRAM - CAMPUSX

Feb 2025

### MACHINE LEARNING A-Z: AI, PYTHON & R - UDEMY

July 2025
